City of Port St. Lucie Utility System Department

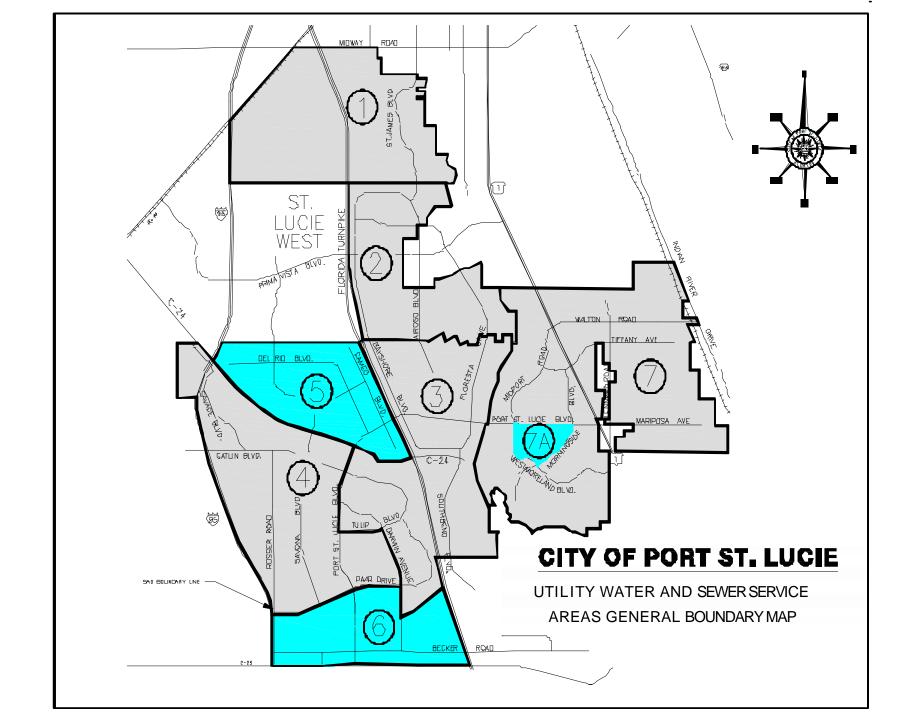

History

• 1960's General Development Utilities

• 1990 St. Lucie County Utilities

• 1994 Port St. Lucie Utility Systems

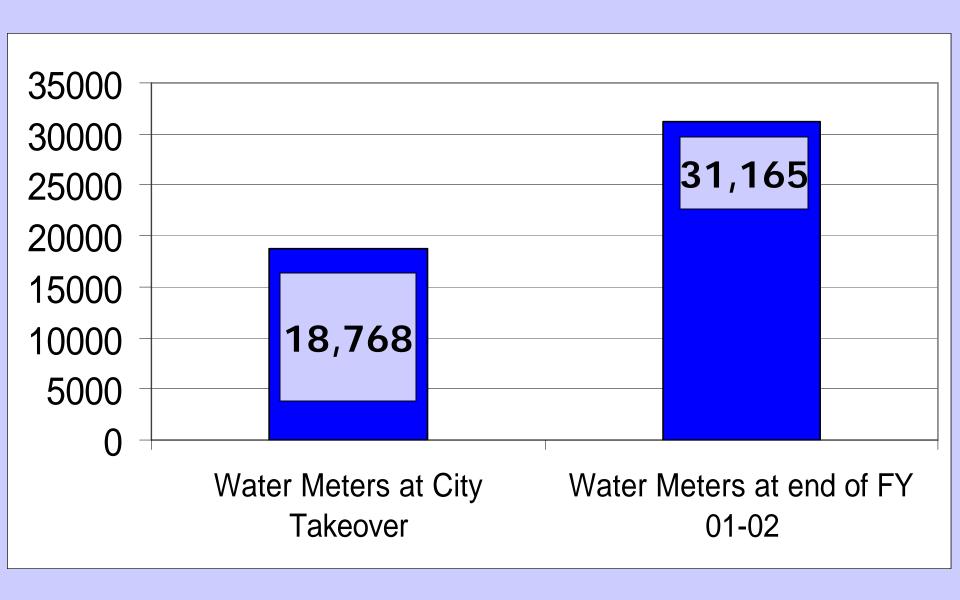

Water Plant Capacity

Lime Softening Plant

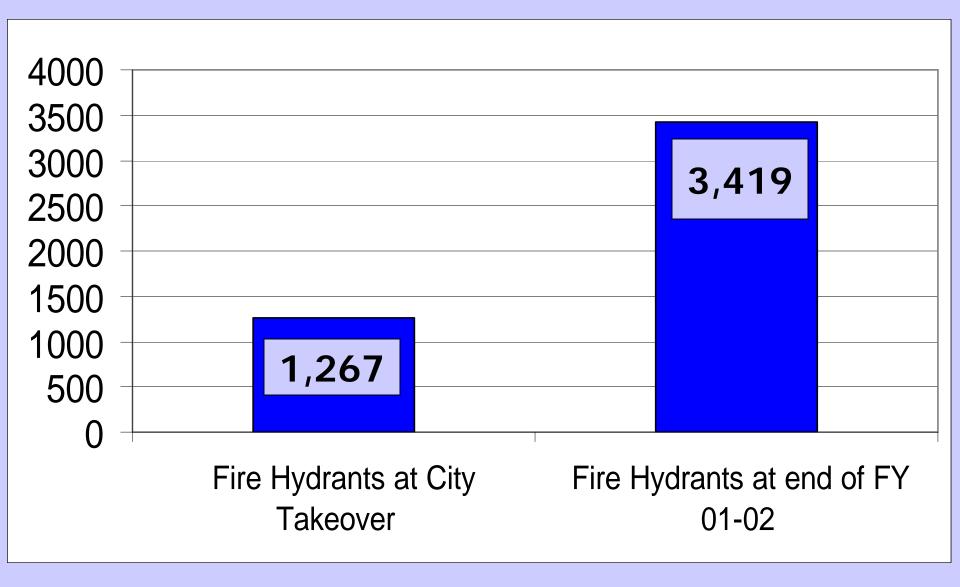

October 1, 1994 = 6.0 MGD

July 1999 = 6.85 MGD

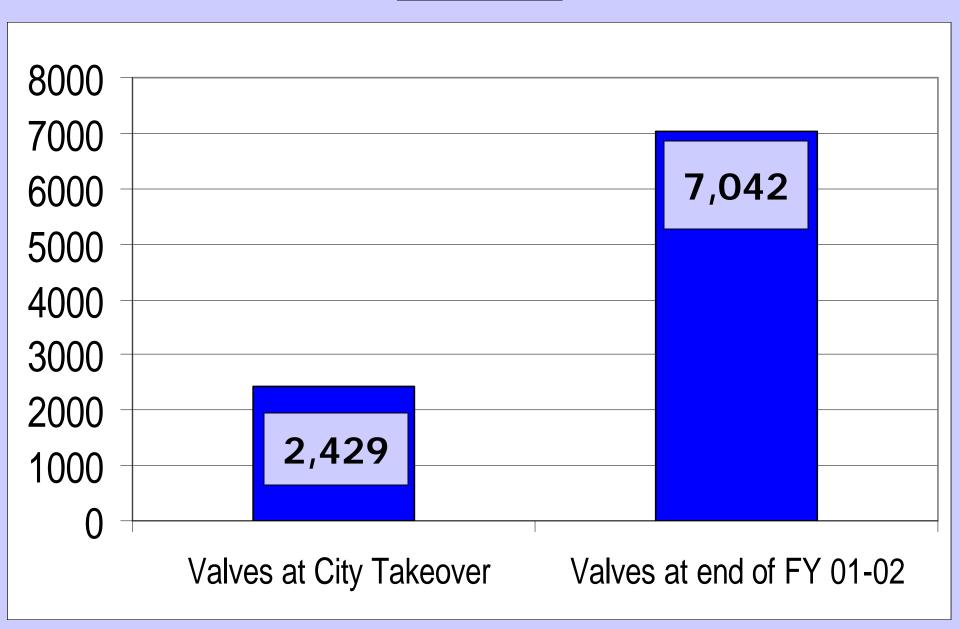

Installed Water Meters

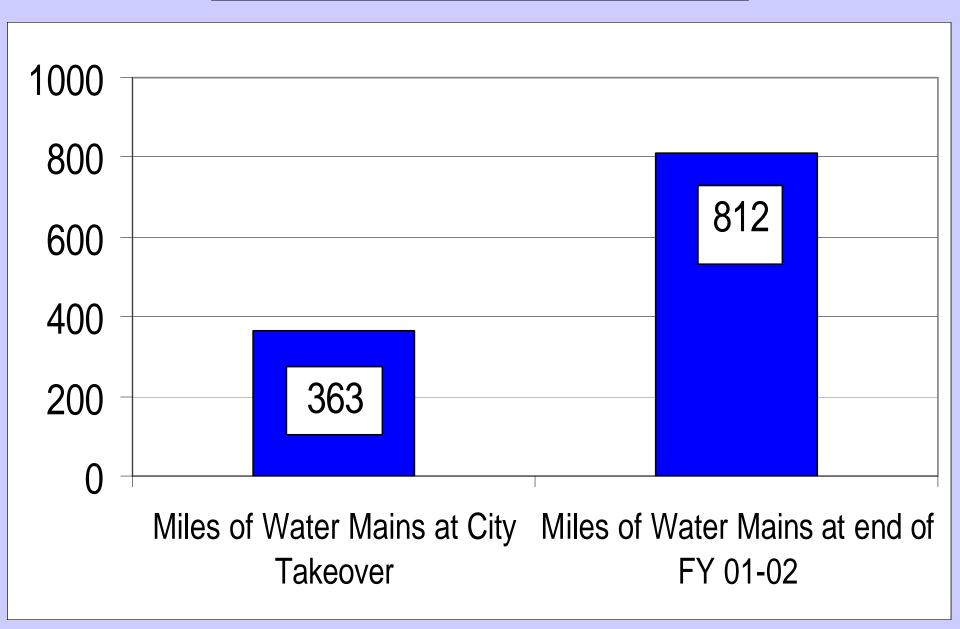

Fire Hydrants

<u>Valves</u>

Miles of Water Mains

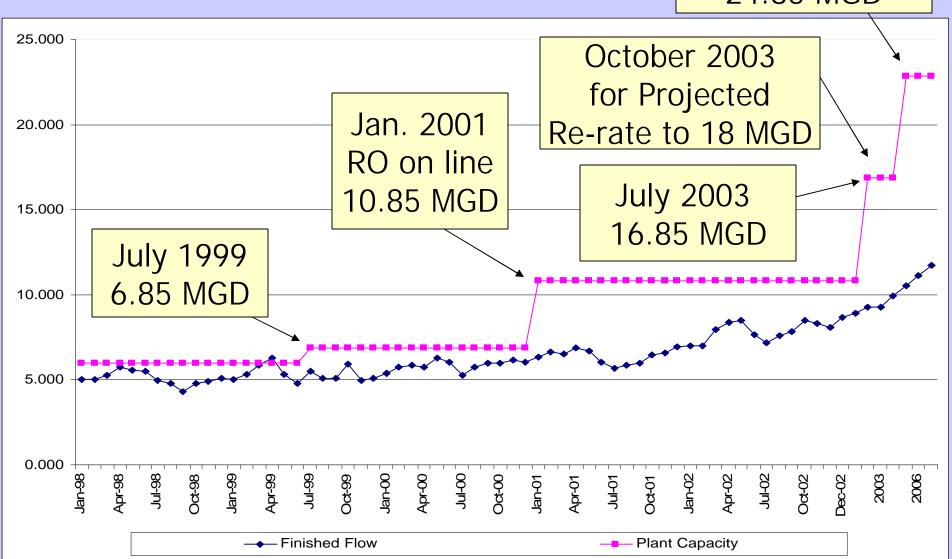

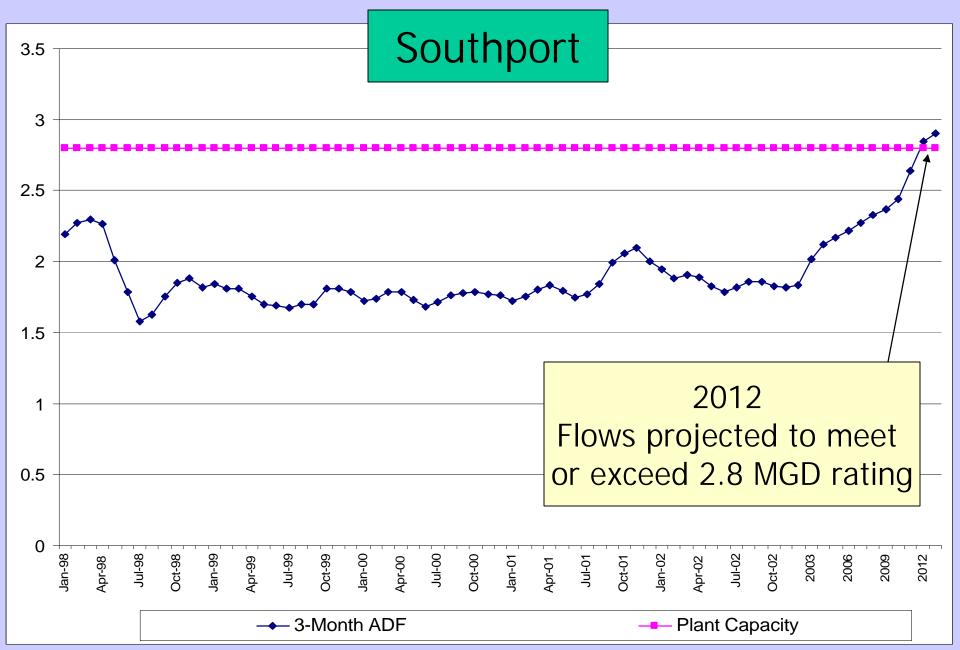

LTC Water Storage Facilities

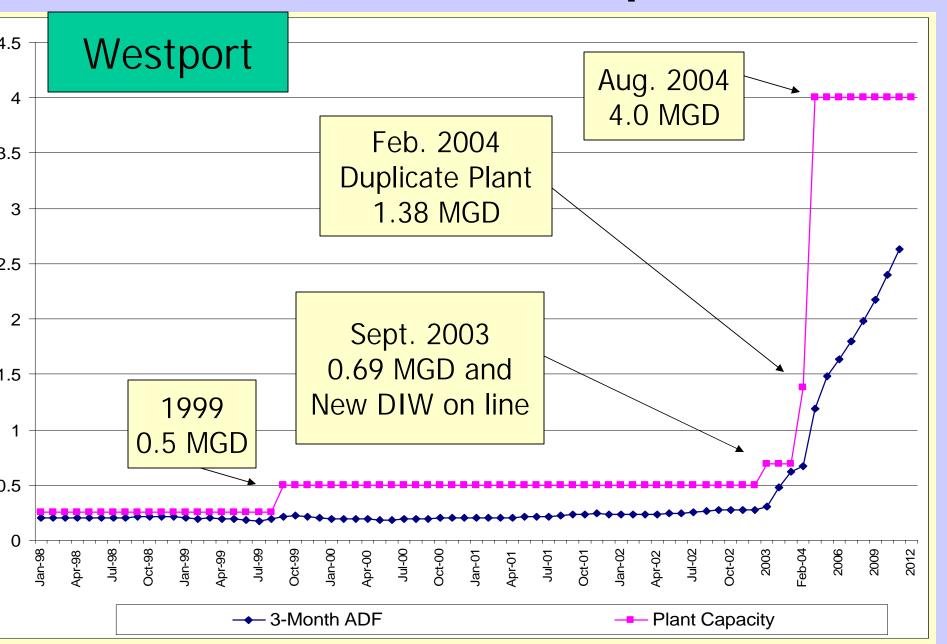

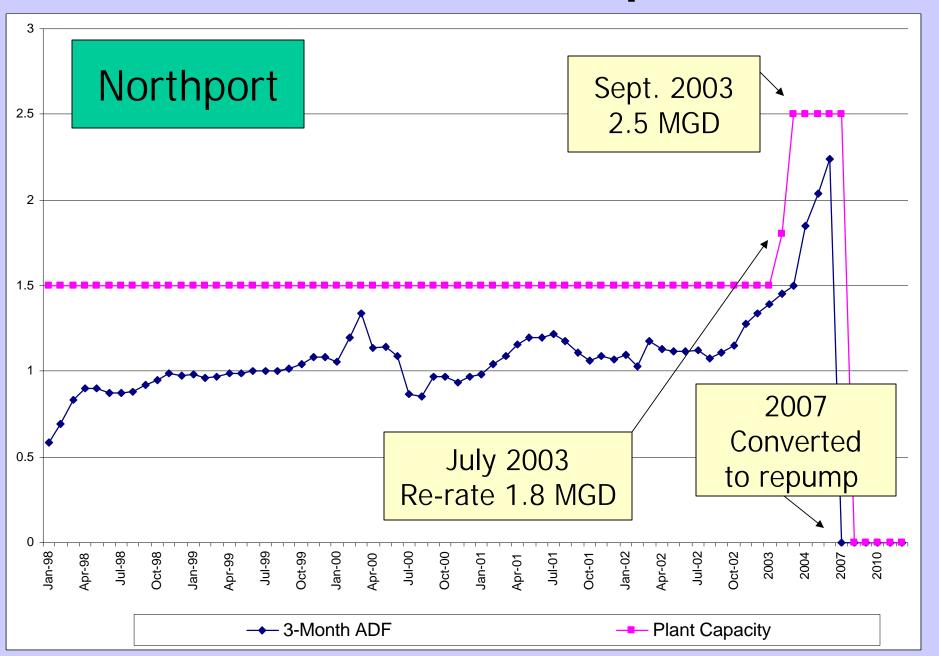

Water Plant Expansions

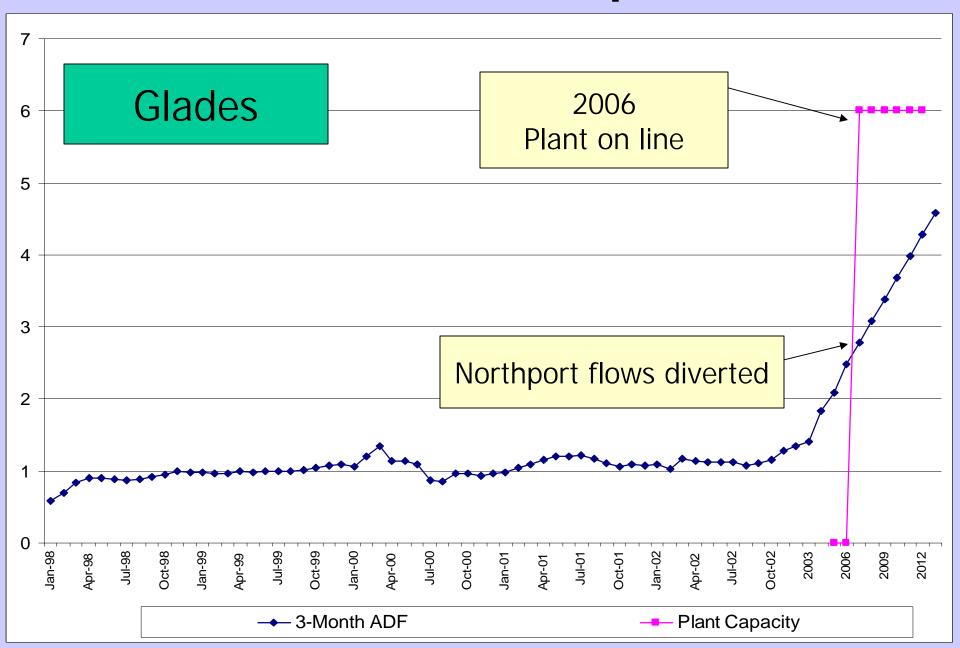

Feb. 2005 1st Phase of LTC 24.85 MGD

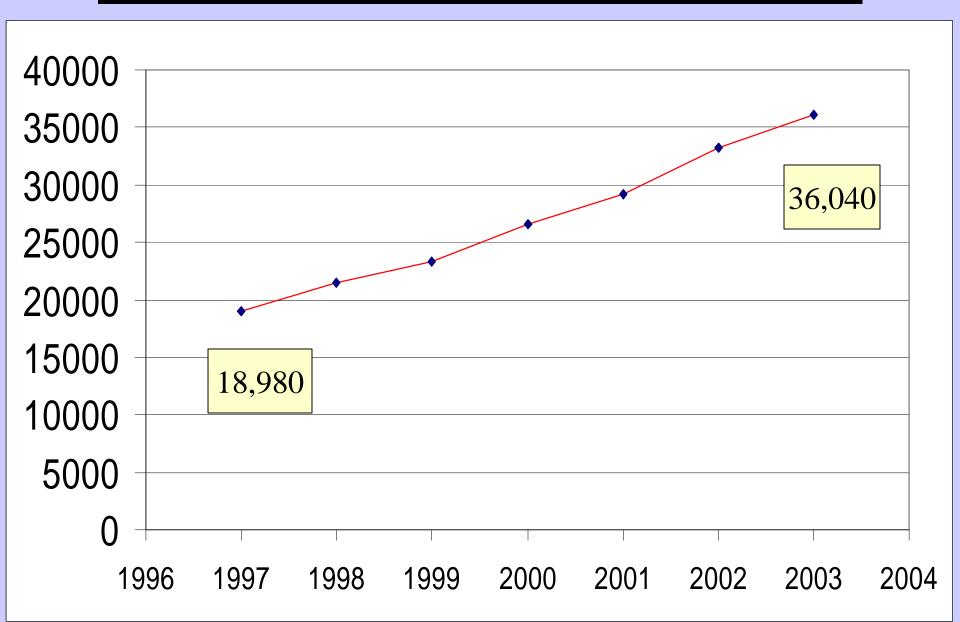

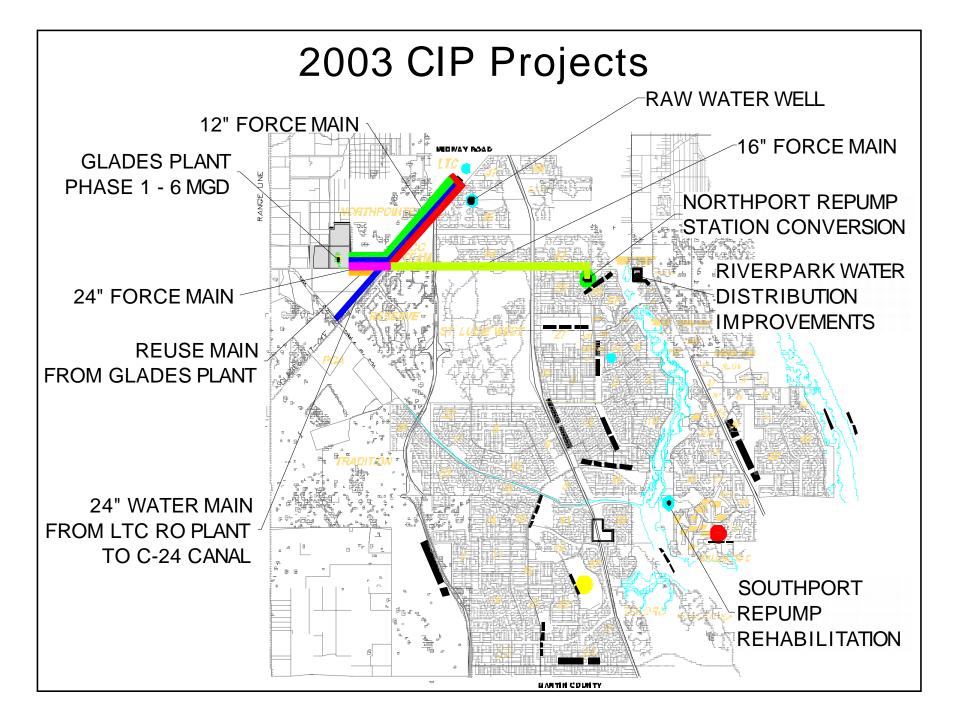

Growth of WaterCustomer Base

Additional Floridan Wells

Master Hydraulic Water Model

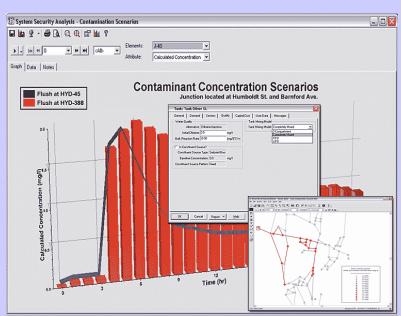

Benefits:

- System Risk Assessment
- Optimize Remote Tank Filling
- Optimize System Flushing
- Conduct Water Age Analysis
- Planning for Future Improvements

Status:

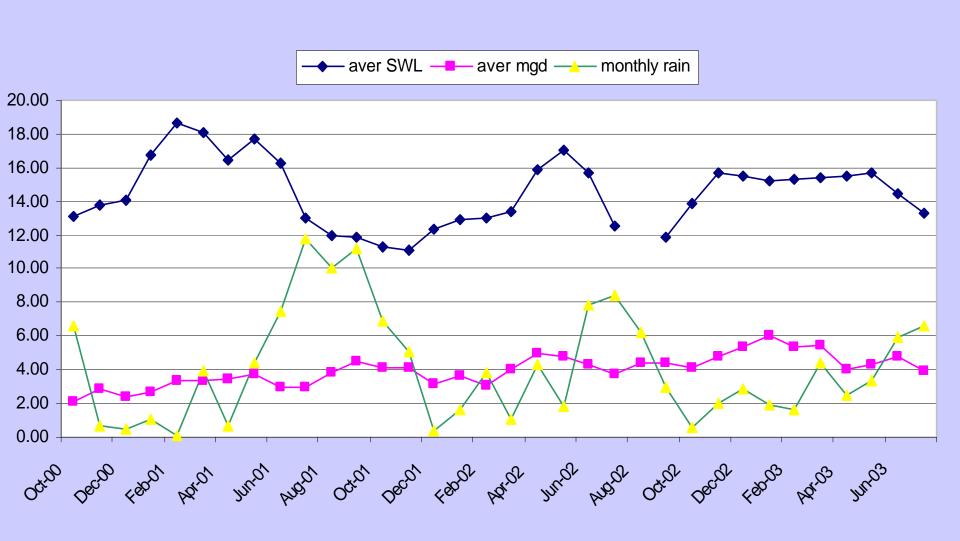

- Project is 65% Complete
- Substantial Completion:

October 2003

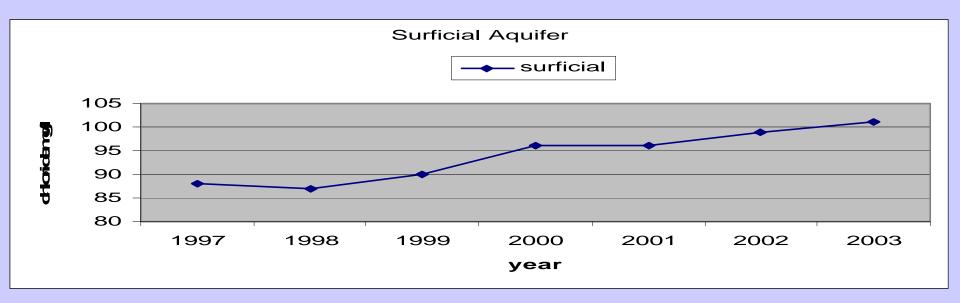

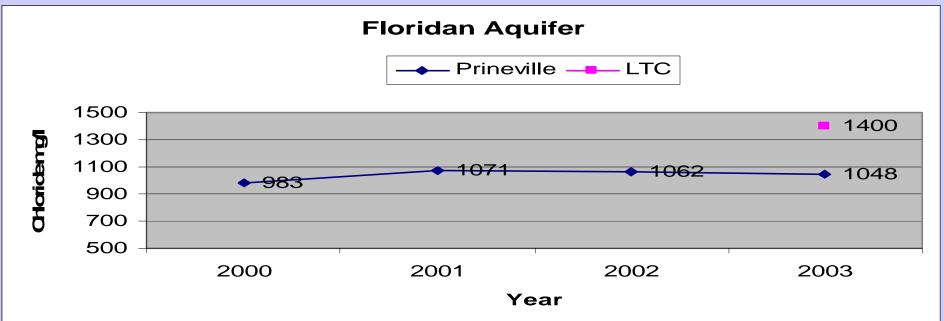

Monitoring Surficial Aquifer

CITY OF PT. ST. LUCIE MONTHLY WELL FIELD AVERAGE STATIC LEVEL WITH AVERAGE MGD
AND MONTHLY RAINFALL

Monitoring Chloride Levels

Public Water Supply Issues

 Model projecting water quality changes in Floridan aquifer

Abandoning Artesian Wells

 Increased funding for alternative water supplies
